Customer Reviews

This book contains a lot of single story house plans. I like that there are several foundation types - crawl space, slab and basement. It has several small (less than 1000 sq ft) layouts, more mid sized layouts, and a good many extra large layouts (3000 sq ft). It gave me some ideas of what I do and don't want in my future home. However, I didn't find a layout that fit what I was looking for.

My husband has spent countless hours poring over this book and dreaming of our future house. The book contains countless options and good accompanying information for each plan.

Some of the plans were hard to read the side measurements, so it would be hard to compare to the home that you are currently in to get an idea of dimensions. Also, several of the homes used a basement or second floor even though it was supposed to be one story homes only. Despite these issues, I would recommend the book as a starting point for new construction plans.

Think these books should be tailored for the section of the country they are being sold in. The largest majority of these plans were for basement, walk out basements or crawl space foundations. Living in Texas all I want is to see plans for slab foundations. So only a couple dozen plans would serve my needs. And I don't want to pay major dollars to have another plan converted to a slab.

This book is really a catalog of floor plans for the purpose of ordering blueprints for \$500 to \$2500. As a general reference book, it's really not too bad. Just think it should be made clear that it is really a sales catalog and that you can't legally use any of the floor plans without purchasing a license and several sets of blueprints.

The house plan book was very well laid out and easy to understand. However, I was looking for smaller houses. This book had only a few plans for smaller homes. It was not clear from the description

Good for those starting the search for home building plans. Just thought I would add that I went to 3 Lowes trying to find home plan books. Not a one in site.

I want small homes (under 1200 sq ft) without attached garages and too few among the designs fit the criteria.
