Customer Reviews

Gotta say--love the app on my phone - ding - your book is outside by the mailbox. This is not a "paperback book" (with a sturdy spine). It is a booklet made from larger sheets, folded and one set of staples in the center. Booklet is softcover with page paper that matte and thinner - like sketchbook paper. Just an FYI for the dye studio. Don't want to get it wet and there is "show through" from the back side. 31 pages are ice dye info. 42 pages are quilt patterns for using the fabric: basic and 1 paper pieced. She has some good suggestions for how to mark sections for placing the dye powder that I had not thought of - along with some diagrams and photos. I would have preferred at least half of the book be on the dyeing. The quilt patterns are an afterthought for

me and not why I bought the book. Frankly, for a book of this price, I was expecting thicker, non-matte paper. If you are an experienced dyer, this is information you can find online, and the rest of the "basic" information you would already know. FYI: dye used is Procion MX dye powder, no RIT etc. There are 8 (if I counted correctly) manipulations. I was hoping for more instructions on the more detailed mandala type pattern as I have seen made by Vicki Welsh, or like these: [...] If you are new to ice cube dyeing (or snow dyeing, which is briefly mentioned) then this would be a great book. I would suggest the perfect pair to this book is Candy Glendening's Dyeing 102 online class "Controlling Texture". It is 10 hrs of video and 130+ pages of PDFs. Sessions 5-8 specifically address texture/shibori/pleating etc that you could use with ice cube or snow dyeing. You can see that info here: [...] Bottom line: the booklet had 1 or 2 tips I did not know. This is not a book: it is a "booklet.
